The Vishay D series comprise class 2, radial leaded, ceramic single layer DC disc capacitors with Y5P dielectric material. The capacitance value ranges from 100pF to 10000pF. Typical application includes temperature compensation, bypassing, coupling, and decoupling.

Ceramic capacitors consist of two or more alternating layers of ceramic material as the dielectric and metal layers acting as the non-polarized electrodes. Applications include automotive, bypass, decoupling, filtering, RF, and ESD protection.

capacitor with a capacitance of $C = 45.4 \text{ nF}$ and a load resistor of $R_{\text{load}} = 250 \text{ } \Omega$. A Heinziger PNC 20000-60 high-voltage power supply was used to charge the capacitor via a charging resistor. The switching voltage V_{SW} was measured with a Northstar PVM-1 ...

In 6 - 10 kV cable networks with isolated neutral, overcurrent protections are widely applied to earth fault protection based on components of working frequency, and in compensated cable networks based on higher harmonics of the zero-sequence current. The selectivity and stability of functioning of the former is, to a significant extent, limited by the ...

3D Printed 10KV Tuning Capacitor. by Harry Lythall (SM0VPO) Introduction. You may have seen my 20m (14MHz) loop, or frame, antenna, and the ease of construction with just a bit of wire and a bit of plastic tube. The tuning arrangement is a little primitive, using just a "gimmick capacitor", comprising two bits of wire twisted together.
