The thin insulating layer of aluminum oxide formed on the anode between the foil plates acts as the dielectric, creating a high-capacitance device in a compact package. These polarized capacitors are well-suited for applications where space and weight are at a premium, such as in electronic devices, power supplies, and filtering circuits.

The Panasonic EEUFC series capacitors are automotive grade, radial polarized aluminium electrolytic capacitors. The capacitance value ranges from 1µF to 1500µF. These capacitors are solution for low impedance solutions.
