There are very good reasons for selecting a battery cell and using it for multiple applications, thus leveraging the maximum buying opportunity for one cell rather than splitting this across 2 or 3 different cells. This means that the specifications of the cell will be fixed. Let us suppose we select a 50Ah cell with a nominal cell voltage of 3.6V

In the traditional battery pack manufacturing process, lithium batteries are first assembled into battery modules with a designed structure, and then the battery modules are installed into the battery pack with a designed structure. This forms a three-level assembly model: Lithium Cell ->Battery module->Battery pack. Part 3. What is a battery ...
