7.2 V Battery Packs are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for 7.2 V Battery Packs.

The 7.2V NiCd Battery Pack is a popular choice among RC enthusiasts who need a compact, reliable battery for their remote-controlled cars, trucks, and other models. Its 700 mAh capacity provides enough power for these vehicles, and its lightweight design ensures that it won't weigh them down. The Tamiya connector is also widely compatible with RC models, making this ...

The RS PRO battery pack produces a nominal voltage of 7.2 V, has a compact space saving design with a 7 Ah capacity. What's more, as it is thermally stable, this rechargeable battery pack operates safely in environments ranging from -20°C to +50°C. It comes pre-wired with bare wire terminals that connect to your devices depending on the setting.

A battery pack is a set of any number of battery cells connected and bound together to form a single unit with a specific configuration and dimensions. They may be configured in series, parallel or a mixture of both to deliver the desired voltage, capacity, or power density. Packs are identified by cell size, number of cells, battery structure ...
