

What is a 12V 80Ah battery?

The 12V 80Ah battery is a LiFePO<sub>4</sub> lithium chemistry battery. It offers BMS controlled safety, long life, and fast-charging performance. The built-in Battery Management System (BMS) embeds smart balancing algorithms that control all cell voltages in the battery, ensuring they are constantly at the same voltage level and optimizing battery capacity. For more details, please check the ELB certification center.

What is 80% battery capacity?

Basically, today's 80% is yesterday's 100%. The old, worn battery is actually at its full capacity, but that capacity is only 80% of what the battery could hold when it was brand new. There's also a chance that the problem isn't with the battery or the display or any controlling software.

What are the advantages of 12V 80ah lithium ion battery?

This 12V 80Ah lithium-ion battery offers high efficiency energy output compared to lead acid batteries. It can accept a continuous charge/discharge current of up to 1C, making it full-charged in one hour. The built-in high accurate LiFePO<sub>4</sub> production technology extends the cycle life to approximately 4000 times at 80% DOD.
