

Exclusive distributors of the most famous brands of solar panels, inverters and other related equipment. Our distribution chain covers all Balkan countries, enabling fast and reliable delivery of solar systems.

Domi Eko Solar will produce two types of panels - 450 W for domestic and business use and 550 W for higher capacity solar power plants. The production equipment was recently supplied by the Italian company Ecoprogetti. The capacity of the plant is 100 MW per year and the plan is to reach it by mid-2024. The investment in production equipment is ...

Ankara Solar, Turkey's solar panel manufacturer, is a leading global provider of comprehensive photovoltaic (PV) solar energy solutions that are truly Taking Energy Forward. By integrating technologies and expertise across the entire solar value chain, Ankara Solar delivers bankable PV energy solutions that maximize the value of our customers' PV investment while ...

Ekskluzivni distributeri vodećih brendova solarnih panela, invertora i prateće opreme za Balkan. Brza i pouzdana isporuka solarnih sistema u sve zemlje regiona.

Discover how cutting-edge solar technologies from global manufacturers can revolutionize project efficiencies in the Balkans. Moderated by Karanovic & Partners, this panel featuring developer and asset owner CWP Global and international manufacturers Runergy and Trina Solar, will delve into practical applications to reduce costs and enhance ...

SHINE SOLAR GROUP is a wholesale distributor of high quality and excellent value Solar PV solutions for projects and installers. We are the official partner various major solar manufacturers for Croatia and the Balkan regions and offer local installers solar PV solutions including all accessories at competitive prices.

2 ???&#0183; Discover the latest rankings and insights into the top-tier solar panel manufacturers of 2024. Explore updated rankings and key information on leading companies in the solar energy industry.

Domi Eko Solar has started to produce photovoltaic panels in its plant near Velika Plana in central Serbia. This is the first solar panel production unit in the country. Serbia is recording a large increase in demand for solar panels for self-consumption. Since the country adopted the legal framework early last year, enabling electricity buyers ...

With comprehensive market data, this report brings clear and concise insights, to help investors, manufacturers and service providers in their decision-making process. As 2021 and 2022 were challenging years for the photovoltaic industry, the time for making the right decisions during 2023 and the next few years is limited.

3Sun in Catania in Sicily, already one of the biggest solar panel manufacturing facilities in Europe, is set to increase output by 15 times. At the same time, it is the only factory for the mass production of bifacial panels, which capture sunlight on both sides. The decision to expand the facility was made in January of last year.
