

Could a digitalized EV battery manufacturing approach be the key to EV performance?

We believe a digitalized,connected approach to battery manufacturing and process optimization may just be the key to driving next-level gigafactory performance. Scale up your gigafactory performance and improve time to market with EcoStruxure for EV battery manufacturing.

How can EcoStruxure improve EV battery manufacturing?

Scale up your gigafactory performance and improve time to marketwith EcoStruxure for EV battery manufacturing. Watch how our end-to-end solutions can help meet goals for high productivity while also increasing efficiency and sustainability. Design and unify the AC/DC electrical networks for reduced lead time.

Can digitalized EV batteries drive next-level Gigafactory performance?

As vehicle electrification is poised to reach new heights,the need for EV batteries is skyrocketing. We believe a digitalized,connected approach to battery manufacturing and process optimization may just be the key to driving next-level gigafactory performance.

As one of the most important outcomes of battery production, battery quality is the result of not only the assembly and testing processes of the physical production line, but also the interconnected data management systems that document how it all comes together.

Sales management is how sales managers organise, motivate and lead their sales reps while tracking -- and improving -- team performance. This includes hiring and retaining top talent, training sales staff, building a healthy sales culture, co-ordinating operations across the sales department, creating sales management strategies and implementing a cohesive sales ...

There are many process management use cases you should be aware of. BPM can be applied throughout your business and across all departments. Here"s a quick list of some process management examples: Sales process management. BPM can help the sales team to automatically issue invoices, exchange quotes, and even coordinate tasks between team ...

By focusing on the resource construction, personnel requirements, delivery service, old parts recovery, service quality assurance, etc., the standard establishes for the first time a relatively complete industry specification in the field of the power battery after-sales service, which fills in the gap in service specification in the ...

Drive core value of EV battery manufacturers, machine builders and System Integrators to meet the requirements and deliver the project successfully. Save engineering / maintenance cost to drive higher ROI of CAPEX investment

We combine smart battery formation with cutting-edge power electronics and energy management to reduce costs and improve efficiency. Our digital production engineering, advanced joining techniques, vision systems, and comprehensive testing methods optimize production processes, while we support simultaneous engineering, plant sizing, and ...

As one of the most important outcomes of battery production, battery quality is the result of not only the assembly and testing processes of the physical production line, but ...

Battery smart manufacturing allows manufacturers to use data and analytics to optimize processes and automate tasks. Learn more about Siemens' comprehensive portfolio of integrated software solutions for manufacturing process planning in this webinar. Battery manufacturers must embrace digitalization to survive the present and thrive in the future.

By focusing on the resource construction, personnel requirements, delivery service, old parts recovery, service quality assurance, etc., the standard establishes for the ...

Drive core value of EV battery manufacturers, machine builders and System Integrators to meet the requirements and deliver the project successfully. Save engineering / maintenance cost to ...

Battery Waste Management (BWM) Rules, 2022 have been notified by Ministry of Environment, Forest and Climate Change on 22 Aug., 2022. These rules are applicable to all types of batteries regardless of chemistry, shape, volume, ...

Sales management is a core business process in most organisations. Sales managers and those in related roles support a company's revenue generation and profits. Effective sales management requires a thorough understanding of the sales process and how you can employ different techniques to drive sales. By carefully analysing key performance ...

Battery smart manufacturing allows manufacturers to use data and analytics to optimize processes and automate tasks. Learn more about Siemens' comprehensive portfolio of ...

With Production Management for Batteries, we enable fast and smooth IT/OT integration in the batteries industry. Additionally, pre-configured tools make the supervision of your technical battery cell production processes easy. Thereby, ...

Delivering high-quality batteries requires you to manage different processes across the whole product lifecycle, from new product development to mass production. It is essential to design with a quality ...

Delivering high-quality batteries requires you to manage different processes across the whole product

lifecycle, from new product development to mass production. It is essential to design with a quality mindset to accelerate battery production.
