

How can dealers accommodate EVs in the aftersales market?

In order to accommodate EVs in the aftersales market, dealers are having to adapt their workshops and processes significantly, and many have installed charging points to ensure vehicles sustain enough power for maintenance work to be carried out. Dealers must also consider technicians' safety when repairing electric vehicles.

How will BEVs affect the aftersales market?

The growth of BEVs and the emergence of CASE mega trends in the automotive industry will have a transformational effect on the aftersales market. Substantial strategic changes requiring major up-front commitment (financial or otherwise) will be required to survive.

Does quality of after sales services affect customer satisfaction?

The data was collected using an instrument from previous study to study the impact of quality of after sales services on customer satisfaction. The main variables effecting customer satisfaction are product quality and social responsibility. The results reveal that customer satisfaction increases with better service delivery.

How will a change in vehicle sales affect the aftermarket?

As the other CASE trends emerge, the total number of new vehicles sold is expected to decrease. Any drop off in new vehicle volume will directly impact the total sales potential in the aftermarket. Similarly, a shift in market dynamics from personal ownership to fleet could result in more pressure on price and slimmer margins.

Will the EV market grow from aftersales?

The EV market is attracting a number of start-ups and new entrants (including established brands with no automotive industry experience). However, from the outset, their future revenue potential from aftersales will not be at the same level that established OEMs have been able to achieve.

Are EVs a good option for Aftersales?

The available aftersales revenue on a three-, four- or five-year old and older EV will be considerably less than for an equivalent ICE (internal combustion engine) vehicle meaning that the potential revenue available will decline.

This is an empirical study on after sales quality of Pakistan's automotive battery manufacturer.
