Sump pump battery backups cost an average of \$900, with high costs of \$1,200 and low costs of \$600. Installing the system by yourself will cost between \$160 and \$600. Sump pumps help keep a home dry during floods. For areas with heavy groundwater, sump pumps regularly activate to expel water before it enters the home.

How much does a battery backup system cost?

However, the price varies, usually between \$600 to \$1,200, depending on the type of backup system you select. A battery backup system is highly beneficial for people with homes in areas that have frequent power outages, as it will power your sump pump, even if your electricity fails.

What is a sump pump battery backup system?

A sump pump battery backup system consists of a sump pump, a 12-volt marine battery and electrical and plumbing accessories. The system acts as a secondary, backup system for your primary sump pump. So, backup systems are not used alone. Instead, they are used in conjunction with another working system.

What is the best battery backup sump pump?

The Wayne ESP25 is the best battery backup sump pump you can rely on to protect your basement when the primary pump is out of commission. It's powerful and sturdy--exactly what you want in a backup sump pump. This pump is an upgraded version of the previous ESP25 model, which featured a thermoplastic construction.

Can a battery backup sump pump run on a 12 volt battery?

A battery backup sump pump requires the use of a deep-cycle battery that's normally sold separately. They come in several forms. Although most emergency sump pumps can run on any 12-volt battery in a pinch, there are some that are better than others for the job. A deep-cycle lead-acid battery with a rating of at least 75 amp-hours is recommended.

Who can install a sump pump battery backup?

A waterproofing contractor or plumber can install a sump pump battery backup for you. Any contractor or professional who installs sump pumps should be able to install a battery backup system. The systems can be DIY-installed, too.

It works well with the power demand of sump pumps. A battery backup sump pump usually requires at least a 75 ampere hour battery to last at least 5 hours of continuous running for the typical pump. Of course, I'd recommend the 100 AH models for longer run hours at ...
