

Does chemstore offer lithium-ion battery cabinets?

Chemstore has introduced a full range of lithium-ion battery cabinets for charging and storage to suit any company's needs and budget.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large or small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.

Why do I need to close the cabinet doors if a battery catches fire?

Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery. It is important that you always close the cabinet doors, because if a battery catches fire, that fire is kept inside.

Lithium-ion battery cabinets. The lithium-ion battery is one of the most common batteries used today. They can be found in electric tools, gardening equipment and electric bicycles. The high energy density of batteries poses risks during both storage and charging. Batteries can go into thermal runaway and catch fire or explode, and the risks are particularly high during the night ...
