Will China Minmetals take control of a 'world-class' lithium company?

China Minmetals Corp. will take control of a province-backed lithium company in a bid to speed development of a "world-class" industry extracting the battery material from salt lakes in the far west of the country.

What is China Minmetals Group (Heilongjiang) graphite industry co?

The new venture, known as China Minmetals Group (Heilongjiang) Graphite Industry Co, will tap the resources of the Yunshan graphite mine in Heilongjiang's Luobei county, according to a statement on Minmetals' official Wechat account. The statement did not provide a timeline for development.

Who is China Minmetals Corporation?

China Minmetals Corporation was founded in 1950. Minmetals, parent of Hong Kong-listed Minmetals Resources Ltd (1208.HK) and Shanghai-listed Minmetals Development (600058.SS), is focusing its overseas expansion on Latin America and Africa to secure natural resources to supply a fast-growing Chinese economy.

Does Minmetals produce lithium & manganese?

Minmetals already produces other battery ingredients such as lithium, nickel and manganese. The new venture, known as China Minmetals Group (Heilongjiang) Graphite Industry Co, will tap the resources of the Yunshan graphite mine in Heilongjiang's Luobei county, according to a statement on Minmetals' official Wechat account.

Will Minmetals take over Qinghai Salt Lake?

Qinghai province, covering a vast sweep of northwestern China, hosts many of the country's lithium-bearing salt lakes. The Minmetals takeover will "accelerate construction of a world-class salt lake industry base," said Qinghai Salt Lake, which is currently controlled by provincial authorities. Its shares rose more than 8% after the announcement.

Will Qinghai restructure the lithium industry?

The restructuring has been under discussion since at least April, and suggests a move by the central government to push for a bigger role in building out a key part of the domestic lithium sector. Qinghai province, covering a vast sweep of northwestern China, hosts many of the country's lithium-bearing salt lakes.
