

What kind of batteries do portable power stations use?

The two main classes of batteries you'll see right now in portable power stations are LiFePO4 and NCM. LiFePO4 batteries utilize lithium, iron, and phosphate, and are considered safer and longer lasting than other batteries. They are, comparatively, lower in price for the power they deliver.

Who makes the best portable power station?

Bluetti is another one of those portable power station companies that make a power station for just about every scenario and every size. However, while they make very good power stations for nearly every person and need, the one thing they do best is emergency power.

What are the best portable power stations to buy in 2024?

Our pick of the best portable power stations you can buy in 2024, from top brands including Ecoflow, Anker, Bluetti, and Jackery.

What are the best portable power stations for drones?

Editor's Note: We updated our Portable Power Stations guide on September 11, 2024, to add the Bluetti AC180T -- a unique station with hot-swappable batteries -- as well as the DJI Power 1000 -- a station primed for keeping your drones topped off.

What makes a power station a 'portable' battery?

Portability: The term "portable" is stretching it sometimes. Batteries are heavy. The larger-capacity power stations are typically on wheels and have telescopic handles, and they are still tough to cart around. If you're looking for something you can actually carry on foot for a distance, you may need to temper your expectations on capacity.

Are portable power stations worth it?

Portable power stations are more powerful and cost effective than ever before. And, thanks to advances in lithium-ion battery technology, they're also lighter and more compact. Whether you've been dreaming of van life or are building out your emergency kit in advance of that next blackout, there is a power station that will meet your needs.
