

What is a battery training program?

is a unique platform for lifelong learning in the field of battery technology. It combines an innovative training program on battery technology with a networking platform for the battery community in Europe and worldwide.

What training does battery associates offer?

Battery Associates offers bespoke battery education courses and training packages for consultants interested in strengthening their knowledge and understanding of the battery sector. Similarly to the BatteryMBA CPD accredited course, certifications may be available.

What is a battery101 course?

Battery101, a course developed by Battery Associates, is a CPD-accredited entry-level course for all battery enthusiasts. This online and on-demand course is perfect for anyone eager to learn or refresh the basics about battery technology. The course takes approximately 3 hours to complete.

Where can I get battery training?

You can get online, on-demand access to our most popular battery training courses from Eagle Eye University. Alternatively, experience hands-on training on-site in our state-of-the-art battery room at Eagle Eye Power Solutions headquarters.

What is EV technology training?

It covers topics such as battery management systems, charging infrastructure, and vehicle control systems. This training is essential for technicians to understand how to diagnose, repair, and maintain electric vehicles. EV technology programs are still in their fledgling state across the US, and they aren't standardized as of yet.

Why does battery education matter?

WHY BATTERY EDUCATION MATTERS? With batteries playing a tremendous role in the energy transition, it is essential to develop a highly skilled workforce along the entire battery value chain. The European Battery Alliance estimates the battery workforce to reach around 800,000 by 2025.

Our newest certificate program will train a new generation of electric vehicle (EV) specialists to work in EV repair, maintenance and manufacturing. Our program is the right choice whether you are an automotive technician interested in ...

Join the European Battery Business Club for an innovative, online battery tech course with industry insights, self-paced learning, and networking opportunities.

Battery refurbishment and repair technology training

Discharging a lead-acid battery. Discharging refers to when a battery is in use, giving power to some device (though a battery will also discharge naturally even if it's not used, known as self-discharge).. The sulphuric acid has a chemical reaction with the positive (Lead Dioxide) plate, which creates Oxygen and Hydrogen ions, which makes water; and it also creates lead sulfate ...

Save money - There's no need to purchase a new battery pack, simply refurbish your existing one. We replace all your battery pack's internal cells with new cells; We can recell & repair Ni-Mh and Ni-Cad battery packs. All Battery ...

See more information about each training series below by expanding each tab, including course overviews, OnDemand availability, and live training dates. (Visit Access OnDemand to see available on-demand training or use the Access Online Training Schedule to ...

This course will deliver from basics of Lithium-ion battery, Battery pack dismantle process and equipment, raw materials, repairing, new ESS battery making & Business Model. Click to Explore BFC

We specialise in hybrid battery repair, replacement, reconditioning, and diagnostics for all hybrid makes and models. Our staff consists of highly qualified and licenced technicians who are enthusiastic about providing quality hybrid battery services. At UK Hybrid Batteries, we understand how important a good battery is to your hybrid car's economy and durability. That ...

This training covers the technical details of a particular electric vehicle model and includes information on maintenance, diagnostics, and repair.
