

What happens when a battery recalibration is complete?

When recalibration is complete, maximum capacity percentage and peak performance capability are updated. The recalibration message will also be removed, indicating that the process is complete. If the recalibration of battery health reporting indicates that your battery health has significantly degraded, the battery service message will appear.

What happens if a battery health report is re calibrated?

If the recalibration of battery health reporting indicates that your battery health has significantly degraded, the battery service message will appear. In a small number of instances, recalibration might not be successful and a new battery service message will appear.

What is Apple's new battery recalibration tool?

Apple expects the new battery recalibration tool will help users to "address inaccurate estimates of battery health reporting for some users." For an unknown reason, this feature is only compatible with iPhone 11, iPhone 11 Pro, and iPhone 11 Pro Max for now.

How do I know if my battery is recalibrating?

While the battery health reporting system is recalibrating, you will see a message in Settings > Battery > Battery Health. Recalibration of maximum capacity and peak performance capability happens during regular charge cycles, and this process might take a few weeks. The displayed maximum capacity percentage will not change during recalibration.

Is Apple recalibrating battery health reporting on iPhone 11 Pro Max?

With the release of iOS 14.5, Apple introduced a new process for recalibrating the battery health reporting on the iPhone 11, 11 Pro, and 11 Pro Max.

Why does the maximum capacity of a battery change during recalibration?

This is because recalibration of the battery's maximum capacity and peak performance capability takes place over the course of regular charge cycles. It's also worth bearing in mind that the displayed maximum capacity percentage won't change during recalibration, and while peak performance capability might also be updated, it may not be noticeable.
