Utilizing advanced heating technology, this soldering iron guarantees rapid heat-up times and precise temperature control for consistent results. Powered by a lithium iron phosphate battery, the Power Pro ensures extended usage time and can be fully charged in just 3-3.5 hours, minimizing downtime and maximizing productivity.

Specification: Item Type: Cordless Soldering Iron Material: ABS, Metal Model: ZD-20D Battery: 3 x 1.5V AA Batteries Required (Not Included) Battery Operating Time: 1 Hour Input Voltage: 4.5V Maximum Temperature: 450ºc Heating Time: 15 Seconds Cooling Time Less Than 30 Seconds Can Be Used Continuously with New Batteries (Not Included) for Approx. 1 Hour How to Use: ...

We have discussed a wide range of battery-operated soldering irons here along with the pros and cons for each. Some are rechargeable, while others require AA-batteries. Depending on your preference, some models heat to a much higher temperature, while others are lower temperature versions that can be used only with lead-based solder.

The best battery powered soldering iron that field professionals recommend and used by thousands of people globally is either the Weller BL60MP, or the Hakko. They are the best because they come from proven brands, are reliable, are of high quality, and most importantly have a decent price tag.

Source of Power: Cordless soldering irons are powered by batteries or butane powered. In butane, as the name suggests, you have a butane gas-based soldering gun which has high-temperature capacity but with it, a high price tag. A battery-powered is the best choice.

It is the best cordless battery soldering iron that features a High-performance lithium-ion battery for Long-lasting working. The battery will give you a maximum of 45 minutes of working time on a single charge. Key Features. Rechargeable cordless soldering iron Powered by a lithium-ion battery. This wireless soldering iron can run up to 1,100 joints after a full charge. However, I ...

B·IRON 500 is specially designed for electronic production and intensive works. It performs up to 500 medium-sized SMD soldering joints per charge. o B·500 Handle, which is fully compatible with C210

I absolutely love this iron and expect it to last for many years. I've heard many great things about these irons [Model #7700] and their lifespan, so I decided to buy this to help in my search for a portable soldering iron...My favorite feature is the fact that it is heat-on-demand, with 45 watts in such a small tip, temperature control is easy and it heats up super fast.

The Tooluxe 40420L cordless battery-powered soldering iron device Runs on 4 AA batteries. Just under 7 seconds can heat 1,050 degrees Fahrenheit, one of the fastest heating Cordless Soldering Iron. A tiny LED bulb under the tip provides the user with a focused job, and the iron tip comes with a close protective cap.
