

Battery transportation price inquiry in Moscow

How many battery buses are there in Moscow?

There are currently 450 battery buses in Moscow, with another 150 to follow before the end of the year. In the medium term, an increase of up to 2,600 cars is planned, out of a total stock of around 8,000 city buses.

How many electric buses will Moscow receive in 2023?

In the spring of 2023, the Moscow Government entered into contracts with KamAZ and LiAZ plants for the supply of 1,200 new electric buses, the city to receive them by the end of 2024 under the largest procurement of this type in Europe.

How many eV stations are there in Moscow?

In September, the city will get 150-kilowatt stations, which can recharge an EV in half an hour, with a total of 250 new, more powerful stations to be set by the end of the year; the number of ECSs in Moscow is expected to reach 11,000 by 2030.

How does Moscow buy electric buses?

Moscow buys electric buses, in particular, using Moscow's green bonds. Two-year public green bonds, which were issued this summer, were used to purchase more than 50 electric buses involving the funds raised from Muscovites and residents of other regions.

Are electric buses the fastest growing urban transport in Moscow?

Currently, electric buses are the fastest growing urban transport in Moscow. They run 79 routes. Their primary advantage is eco-friendliness. Replacing one diesel bus with a modern electric one reduces CO2 emissions into the environment by 60.7 tons per year.

Are electric buses coming to Mosgortrans?

"Moscow is one of the world's leaders in the use and development of electric transport. In three months, almost 200 cutting-edge electric buses have arrived in Mosgortrans garages, and we expect about 600 more by the year-end. We continue to make trips more comfortable and safer for passengers, as ordered by Sergei Sobyenin," said Maxim Liksutov.
