

Who makes standard battery vent caps?

Standard battery vent caps are manufactured by Flow Systems. We currently supply most of the world's leading battery companies with this same battery vent cap. Designed for a Forklift Battery, Golf Cart Battery, Alternative and Solar Energy Battery, and many more.

What is a vent cover?

Vent covers are plastic components with flaps that allow moist air to exit while keeping pests and debris outside. From a venting perspective, bathroom exhaust fans can terminate the duct through the roof instead of an exterior wall. This only changes the location of the exhaust.

What is the function of a battery vent?

The battery vent is a designed weak spot on the battery cap that opens when the battery pressure reaches a predetermined value. Its function is to mitigate the hazard from a single-cell explosion and reduce the risk of thermal runaway propagation.

What is a battery vent cap's function?

A battery vent cap is a normally sealed mechanism which allows the controlled escape of gasses from within a cell.

What size battery vent do I Need?

If you are unsure, measure your battery vent opening to make sure it is at least 1.14" in diameter. This style of battery vent cap is by far the most common type of vent in the country and is used on most golf carts, solar battery installations, RVs, Motor Coaches and many other deep cycle batteries.

Which battery brands do speed vent caps fit?

We have speed vent caps to fit most brands, including Crown, Interstate, US Battery, Rolls Surette, Trojan, Tulip, Exide, and more. We make speed vents that fit both 3-cell (6-volt) and 4-cell (8-volt) batteries. To choose the correct size, please measure your battery before you place an order by following the steps above.
