

What is the energy transition plan in Argentina?

On July 7, by Resolution 517/2023 of the Secretariat of Energy (of the Ministry of Economy), Argentina approved the National Energy Transition Plan to 2030 and the Guidelines and Scenarios for the Energy Transition to 2050.

What is the Argentine energy plan?

The broad objective is to ensure that the future Argentine productive structure is inclusive, dynamic, stable, federal, sovereign and environmentally sustainable. The plan entails significant investments for increasing renewable energy-based generation capacity, electricity transmission works and the gas pipeline network, among others.

What are the Argentine energy policy guidelines?

The guidelines call for structural change in the systems of supply and use of energy. The broad objective is to ensure that the future Argentine productive structure is inclusive, dynamic, stable, federal, sovereign and environmentally sustainable.

How many solar farms are there in Argentina?

The solar farms are the 68.11-MW Zonda I, the 31.89-MW Zonda IB, the 17-MW Cura Brochero and the 8-MW Cura Brochero Ampliación. The biogas power plant brought 3.12 MW. At the end of the second quarter, Argentina had 5,393 MW of installed renewable energy capacity across 202 operational plants.

What percentage of Argentine electricity is renewable?

In April, renewables met 14.8% of the total electricity demand. This percentage dropped to 13.8% in May and to 13% in June, the energy secretariat said, citing data from Argentine wholesale electricity market administrator CAMMESA. Choose your newsletter by Renewables Now. Join for free!

Where is a 500 kV line in Buenos Aires?

The 500 kV line, spanning 358 km, will connect Plomer on the outskirts of the capital Buenos Aires with Vivorat; to the southeast, a town close to the coastal city of Mar del Plata. Another 37-km line will connect Plomer with Ezeiza, a district in Buenos Aires.

BUENOS AIRES, Dec 23 2022 (IPS) - With large projects held back by the economic crisis and lack of infrastructure, Argentina seems to be looking at an alternative path towards a more sustainable energy mix involving small renewable energy projects, promoted by environmentally aware industries, businesses and private users.

Argentina's federal energy department introduces rule changes to support renewables penetration in the Mater

market, while also preparing for a solar PV tender and a thermoelectric capacity auction. Learn about the ...

As a frequent traveler, I understand the importance of secure luggage storage when exploring a new city. That's why I always look for reliable and safe options to store my belongings. In Buenos Aires, there are several options for luggage storage, including Almacenamiento de Equipaje Seguro (Safe Luggage Storage) and Almacenamiento de Equipaje (Luggage Storage). When ...

The 500 kV line, spanning 358 km, will connect Plomer on the outskirts of the capital Buenos Aires with Vivorat&#225; to the southeast, a town close to the coastal city of Mar del Plata. Another 37-km line will connect Plomer ...

Interested parties are being invited to propose projects encompassing the financing, construction and management of energy storage systems in the wholesale electricity market. The projects could be for optimising generation dispatch, providing power reserve services or other mechanisms proposed.

Argentina enabled seven new renewable energy projects to reach commercial operation in the second quarter of 2023, adding 173.12 MW of installed capacity across the ...

The plan also includes goals to develop a variety of renewable energy sources (wind, solar, small hydro, biogas and biomass) as well as distributed generation, "directly at the point of consumption" and connected to the public grid, at residential and commercial levels.

Buenos Aires, as a vibrant metropolis, offers the perfect setting for this international gathering, making it essential for anyone interested in energy efficiency and sustainable developments. The Energy Efficiency Expo take place annually, and therefore ...

Argentina's federal energy department introduces rule changes to support renewables penetration in the Mater market, while also preparing for a solar PV tender and a thermoelectric capacity auction. Learn about the initiatives and their implications.

The Secretary of Energy has launched a call for expressions of interest for battery energy storage systems ("BESS" and the "BESS EOI"). The announcement was made ...

The central region of Argentina combines large storage capacity in the Neuqu&#233;n Basin and great hydrogen production potential in the southern Buenos Aires ...

Argentina is aiming to generate 57% of its energy from renewable sources by the end of the decade, according to an official energy transition plan launched in late June.

Trusted luggage storage locations all over Buenos Aires Open 24/7 No size restrictions Book online now with

Radical Storage, the first luggage storage network in Buenos Aires

The Secretary of Energy has launched a call for expressions of interest for battery energy storage systems ("BESS" and the "BESS EOI"). The announcement was made by Resolution 906/2023, published on November 8, 2023.

The central region of Argentina combines large storage capacity in the Neuquén Basin and great hydrogen production potential in the southern Buenos Aires Province, close to the city of Bahia Blanca and also in the unconventional gas resources of ...

The plan establishes two broad scenarios for supply of electricity by 2030--one to reach a 20 per cent share of renewable energy in the generation matrix with an investment of USD9,924 million (REN 20), and the second to ...
