The CBB60a series of motor run capacitors is ideal for start and run applications in single-phase asynchronous motors and general A.C. applications at industrial frequencies. The CBB60a start capacitor is small in bulk, has long life-span and good self-healing characteristic.

Application: BM CBB60 capacitors are widely applied as AC motor start or motor running for water pump, washing machine, paper smashing machine, ceiling fans, ventilation equipment, air conditioning and so on. Rated voltage: 110VAC~600VAC(50/60Hz) Capacitance range: 1 μ F - 100 μ F; Capacitance tol.: \pm 5%(J), \pm 10%(K)

AC Motor Capacitor (CBB60A) When the capacitor is working, the loss is too large, which leads to the increase of its own heat and temperature, thus shortening its life; low loss can make the capacitor more stable in the use process, and the service life of the capacitor will not be affected.
