

What is the market size of solar thermal heating market in China?

China's solar thermal heating market has gradually occupied the main capacity in operation in business segment of the market, of which the overall share of the project market in China from 2000 to 2021 reached 74% in 2021 and the retail market 26%. Sales of domestic hot water systems are continuing to grow.

How big is the solar thermal market in China?

China's Solar Thermal Market Shifting from Individual Installations to Large-scale Projects In 2021, the cumulative operation capacity of solar thermal systems in China reached 481.94 million square meters, accounting for 72.8% of the world's installed area. The installed capacity of solar thermal power generation is 588 MW, accounting for 85.3% of the world's total.

How many solar thermal power demonstration projects are there in China?

The Blue Book summarizes the operational status of seven solar thermal power demonstration projects in China and one solar tower plant in a multi-energy complementary project.

How much solar power does China have?

According to statistics of the China Solar Thermal Alliance, by the end of 2021, the total installed capacity of global solar thermal power generation reached 6.8 GW, and the figure in China was 538 MW (only including power generation systems at or higher than the MW scale).

What is the China Zhongchuan Xinneng Ulath 100MW solar thermal power plant?

The China Zhongchuan Xinneng Ulath 100MW solar thermal power plant project. The Tibet Langkazi project was completed in 2018 in Langkazi County, Shannan City, Tibet, with a total heating area of 82,600 m<sup>2</sup> and a total heat load of 4.3 MW. The heating outdoor design temperature is 7°C.

What is China's solar thermal policy?

China's policy has increased the policy guidance on using clean energy to new solar thermal improve the effect on the solar thermal industry than the official implementation of the application types in clean heating policy in 2015 and the "carbon peak and carbon neutrality" policy proposed in 2021. The former has shown a solid implementation.
