

Can I ship a lithium battery cross-border?

There are regulations attached to the cross-border shipping of batteries to ensure they travel safely. These regulations vary depending on the type of batteries. Lithium batteries, for example, are classified as Dangerous Goods, so not all types of lithium batteries are accepted by DHL Express which you can check [here](#).

Can a lithium battery be transported on a plane?

Standalone lithium batteries are prohibited to transport as cargo on passenger flights. Lithium batteries that are attached with the equipment can be shipped by air, but there are restrictions on the quantity of batteries and the type of equipment.

Are lithium batteries safe to ship?

Improperly packaged lithium batteries can ignite, causing fires that are difficult to extinguish and pose a significant risk to the safety of transportation workers and the general public. Other battery types, such as alkaline or nickel-metal hydride (NiMH), are generally considered safer to ship.

What is a lithium ion battery?

The term "lithium battery" refers to a family of batteries with different chemistries. For the purposes of the dangerous goods regulations they are separated into two types of batteries: lithium metal and lithium-ion. What is the difference between lithium-ion and lithium metal batteries?

What are the shipping requirements for lithium ion batteries?

In addition, lithium-ion cells and batteries shipped by themselves must be shipped at a state of charge not exceeding 30% of their rated capacity. Lithium batteries are dangerous goods, and all of the regulatory requirements must be complied with, as set out in the Lithium Battery Shipping Regulations.

Do 3PLs & freight forwarders ship lithium batteries safely?

Not all 3PLs and freight forwarders have the experience required to ship lithium batteries safely and in full compliance. But just about all say they do, and that can expose you to a ton of risk - from supply chain delays to government fines to high-liability accidents.

The 100-ah Battle Born lithium battery we chose costs just over \$900 and more than doubles the available power. Remember, because lead acid batteries often need to be replaced every few years, the lithium battery you replace it with may be the only battery the RV will ever need. Depending on how long you keep it, of course! We paid about \$60 ...
