

Does the HJ Smart Home Screen have a battery

What is Xiaomi smart home screen 10?

Xiaomi has launched the Smart Home Screen 10, an intelligent home control system. As predicted last month, the new gadget is similar to a Google Nest Hub or Amazon Echo Show device, with a 10.1-in (~25.6 cm) HD touchscreen display that you can use to control your smart home products or for entertainment.

How to buy smart home devices?

First, you'll need to make sure all the smart home devices you buy are compatible. Then, each device will also have its own requirements and features to look for. Here's our guide on how to buy smart home devices for your home and our top picks for each kind of smart home device.

Why should you buy a smart home device?

Smart home devices are designed to make your life better, so a good user experience is all part of the package when it comes to the best products. You also don't need to buy all of the gear at once. You can start small with a smart speaker or a light strip and accumulate the gadgets that enhance your day from there.

Does Xiaomi Home smart screen Pro 8 have a battery?

Moreover, the Home Smart Screen Pro 8 has a 7,500 mAh battery that gives it an added element of portability that its 6-inch and 10-inch siblings lack. Elsewhere, the smart monitor has a chipset with four ARM Cortex-A53 cores that Xiaomi complements with 2 GB of RAM and 16 GB of flash storage.

What is a smart home screen 10?

The Smart Home Screen 10 has dual stereo speakers, a built-in microphone and a 5MP HD camera with a 115° wide-angle lens. These tools enable you to make video calls, with face-tracking technology ensuring that you are always in shot. The gadget measures 246.6 x 240.5 x 37.5 mm (9.7 x 9.5 x 1.5-in) and has 90 to 120° adjustable screen elevation.

Which Smart Display should I buy?

Google Nest Hub Max The Google Nest Hub Max is the best smart display you can buy right now. The 10-inch screen is clear and sharp, and offers a notable upgrade to the Google Home Hub's 7-inch display.
