We are more specialized in rooftop solar installations: houses, offices, commercial buildings, agricultural buildings, warehouses, ... All our design office engineers and site managers have been trained in France with the QUALI PV distinction.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy, with an average annual solar radiation value of some 6 kWh/m²/day. Solar photovoltaic (PV) energy is an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030, Mauritius has commissioned six more solar farms.

Can solar energy be used for water heating in Mauritius?

In order to encourage use of solar energy for water heating in Mauritius, incentive schemes would be implemented. Solar water heating is the most common form of solar energy conversion, used in Mauritius.

Other countries exporting modules to India do not face this duty currently. The 15% safeguard duty is levied on the total import value of cells and modules. It increases the cost of imported solar equipment and was intended to create a more level playing field for Indian manufacturers. However, even with the safeguard duty in place, solar developers in India continue to largely ...
