Why is solar energy important?

Solar energy will play a significant role in helping to meet energy needs in a manner that is environmentally sustainable. AFRY is at the forefront of solar development and, over the past 15 years, we have been actively involved in leading solar projects around the world, including landmark projects that achieved world-record LCOE values.

What does a solar project manager do?

From ecological assessment to the negotiation of offsets and conditions, we scope and manage complex technical studies and prepare environmental assessment documentation to support the successful development of solar projects.

What does a solar consultant do?

Offering specialist technical, operational and commercial due diligence services and advice, we support strategic infrastructure investment in solar. Our consultants focus on key investor concerns including future investment requirements and plans (Capex), expected future operating costs (Opex) and potential areas of operational improvement.
