

Will Ghana become the first country in West Africa to produce lithium?

Ghana is set to become the first country in West Africa to produce lithium, a key component in electric vehicle batteries and renewable energy storage systems. The Ewoyaa lithium project, developed by Atlantic Lithium, is expected to start production in 2025 and reach its full capacity of 365,000 tonnes of lithium annually in 2026.

Why should Ghana invest in Ewoyaa Lithium Project?

The Ewoyaa lithium project could position Ghana as a strategic supplier of lithium in the global market and help diversify its economy away from traditional commodities such as gold, cocoa, and oil. The project could also pave the way for further exploration and development of other lithium deposits in Ghana and the region.

What is the Ewoyaa Lithium Project?

The Company's flagship project, the Ewoyaa Lithium Project, set to be Ghana's first lithium-producing mine, is being advanced to production under an agreement with Piedmont Lithium. The project is well located to excellent infrastructure and is proven to produce a spodumene concentrate product suitable for conversion to be used in EV batteries.

Who is the Executive Chairman of Atlantic Lithium Limited?

The Executive Chairman of Atlantic Lithium Limited, Mr. Niel Herbert, thanked the Minister and Government for their cooperation in reaching this milestone. He said the Ewoyaa project is very important to the company, and the company is willing to work with Government to ensure the effective exploitation of this mineral for the benefit of Ghanaians.

Will Ewoyaa be the first lithium mine in West Africa?

The Ewoyaa lithium project in Ghana is expected to start production in 2025 and become the first lithium mine in West Africa. The project could transform Ghana's economy and boost its green transition.

Where is lithium found in South Africa?

Barari Ltd. commenced exploration for lithium in the country in 2017 and discovered high grade lithium in commercial quantities in Ewoyaa. Geological investigations, also, show deposits in various parts of the country, from the south to the north, predominantly around Cape Coast, Kumasi, Sunyani, Bole and Wa.

Atlantic Lithium (A11) is set to establish Ghana's inaugural lithium mine, known as the Ewoyaa project. Despite reporting a \$12.4 million loss for the fiscal year ending June 2024, Atlantic Lithium at the site. Under an agreement with Piedmont Lithium (PLL), they will fund nearly 70% of the \$185 million needed for construction, as outlined... [Read More](#) »Atlantic Lithium ...
