

Guyana Energy Storage Tank Company Factory Operation

What is the gas-to-energy project in Guyana?

Our operations in Guyana are helping to supply the world's energy needs by producing more than 600,000 barrels of oil a day. The Gas-to-Energy project is expected to greatly improve the quality of life for the people of Guyana.

Does ExxonMobil have a natural gas project in Guyana?

The project will utilize natural gas from the Stabroek Block's Liza Phase 1 and 2 Projects. During the company's first-quarter 2024 earnings presentation, ExxonMobil Chairman and CEO Darren Woods highlighted the benefits of this project, describing it as a "win-win proposition," particularly for the people of Guyana.

How many barrels of oil are produced a day in Guyana?

More than 100 miles offshore Guyana, three of the world's largest, best-in-class floating production storage and offloading (FPSO) vessels - the Liza Unity, the Liza Destiny and Prosperity - are producing more than 600,000 barrels of oil every day - up from 370,000 just one year ago.

Will Guyana's new gas project help reduce energy costs?

The project, expected to help lower electricity costs and reduce emissions once completed next year, will be the first to take advantage of associated gas produced in the country. Guyana has so far invested some \$400 million in the development.

How much money has Guyana invested in Exxon?

Guyana has so far invested some \$400 million in the development. The Exxon consortium, also integrated by China's CNOOC (0883.HK) and U.S. Hess (HES.N), temporarily halted crude and gas output at the platforms in the third quarter to allow the pipeline connection.

What's happening in Guyana?

Last month, at the Guyana Energy Conference and Supply Chain Expo, we showcased the success we've had in Guyana to date and discussed the projects we have planned for the future. One of those projects is a 140-mile pipeline that will connect our offshore operations to the mainland.
