

Hand saw battery repair price and pictures

How do you replace a battery in a power tool?

You'll need new cells, a soldering iron and rosin-core solder, a glue gun, and some wire and tape. The whole process takes about an hour. Most power tool battery packs use 1.7-in. x .9-in. "Sub C" size batteries. Remove the screws that hold the pack together and yank the top off. Then remove the cluster of batteries and measure one of the cells.

Can you replace a cordless tool battery?

Transfer the temperature sensor and insulators from the old battery and reinstall in the plastic case. Charge it up, test it out and start your next home improvement project. Cordless tool batteries eventually fail, but replacement batteries can be amazingly expensive. To save money, consider rebuilding the battery pack.

How do I save money on a power tool battery pack?

To save money, consider rebuilding the battery pack. When your power tool battery pack bites the dust, probably your first inclination is to buy a new one. But if the battery is out of production or the price of a new one is sky high, consider rebuilding it yourself instead of paying a professional rebuilder. That'll save you about \$25.

How long does a power tool battery pack take?

The whole process takes about an hour. Most power tool battery packs use 1.7-in. x .9-in. "Sub C" size batteries. Remove the screws that hold the pack together and yank the top off. Then remove the cluster of batteries and measure one of the cells. Then get the milliamp-hour (mAh) rating off the old batteries (or search online for the cell specs).

It depends on the cost of repair and the availability of repair parts vs quality of tool. I personally have rebuilt my air impacts several times for less than 1/3 the cost of a new impact. When the handle of my DeWalt 18v recip saw broke off, a local dealer had a tool only sale and I bought a replacement saw for less than 2 handles would have ...
