What is a battery line safety storage cabinet?

The BATTERY line safety storage cabinets are specially designed for safe storage and charging of lithium-ion batteries.

What is the purpose of a battery cabinet?

Battery cabinets are used primarily for aesthetic reasons to house batteries in an office environment. They are typically used with valve regulated lead acid (VRLA), semi-sealed batteries that form an integral part of the UPS. These cabinets are manufactured from mild steel and are then powder coated to a desired color.

Which lithium ion battery cabinet should I Choose?

For safe storage (and charging) of your batteries you choose the Salvus lithium ion L2. This battery cabinet is equipped with an automatic extinguishing system, which means that any fire will be extinguished in the cabinet itself. Without causing further damage. In our webshop you will also find the Salvus lithium-ion L3 battery cabinet.

How to store and charge lithium-ion batteries safely?

You can store and charge lithium-ion batteries safely in the Batteryguard fire-resistant battery cabinet L. A compact entry-level model with an integrated warning system and eight or ten charging points. The cabinet is based on an EN 15659 LFS60P-certified model with fire-resistant properties.

How does a batteryguard battery cabinet work?

The Batteryguard lithium-ion battery cabinets are also equipped with a mechanical ventilation system. This fire resistant ventilation grid consists of a frame and slats and is filled with thermo-expansive material. When the temperature exceeds 100°C, the grille will close and seal itself.

Do you use a Certified Safe Cabinet?

As a basis, we use a certified safe cabinet that offers 1 hour of fire protection according to EN 15659 LFS60P. To enable the safe storage and charging of lithium-ion batteries, we have to modify a number of points in the cabinet. Since this changes the construction compared to the original, no certification may be carried out.
