

Honduras has launched a consultation on regulatory changes to its electricity network to help better integrate energy storage, which it said is key to maintaining the stability, efficiency and sustainability of the network.

Energy Storage. enabling a world powered by renewables. news. STE Energy at Hydromatters 2023. On Tuesday 19th of September 2023, STE Energy will be attending the Hydromatters Conference and Exhibition in Padua, Four ...

Renewable generation now accounts for 22% of Honduras' electricity mix, but growth has been limited by its transmission system operator (TSO) CND to ensure quality and security of supply. Energy storage will be key to continuing to ensure that while increasing renewables, the CREE said.

Flexible power generation technology answers Honduras island's energy demands. Storage technology optimises engine plant performance and facilitates renewables integration. A major sustainable energy transition is happening in ...

Upower, Inc. (UPI) is a global renewable energy producer and developer, specializing in Solar Projects and Battery Storage Production. In January 2014, our subsidiary, Upower Honduras, signed a much-publicized 20-year Power Purchase Agreement (PPA) with the Government of Honduras and their National Electric Company, Empresa Nacional de Energia ...

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal said. The Amaratoca substation belongs to the National Company Of Electric Energy (ENEE), the country's main utility.

Norway-based thermal energy storage company Kyoto Group has signed a letter of intent (LOI) to deploy an 88MWh system in Spain in the second half of 2023. The LOI has been signed with an unnamed company described in a press release as "one of the largest owners of cogeneration facilities in Spain". The agreement, if followed through, will see Kyoto ...

"En Honduras, aunque muchas centrales tienen inversores con la capacidad técnica de poder resistir huecos de tensión, no fueron ajustados correctamente porque no había una norma nacional ni regional que oriente u obligue a hacerlo, causando ese tipo de disparos en el sistema", consideró José Antonio Morán Maradiaga, gerente general de ESCO Honduras.

Last week (7 November) saw bids opened for a 75MW/300MWh BESS tender launched by the government of Honduras, in Central America. Honduras has launched a ...

Energy technology group Wärtsilä is to add an energy storage solution to a power plant on the island of Roatan in Honduras. The existing 28 MW plant operated by Caribbean utility RECO ...

Latin Energy Group > Blog > Informacion > Información de Mercado > energiaestrategica > Proponen nuevos requerimientos para eólica y solar en Honduras. La Comisión Reguladora de Energía Eléctrica (CREE) publicó la Consulta Pública CREE-CP-04-2023 denominada "Norma Técnica Transitoria de los Servicios Complementarios de Control ...

Upower, Inc. (UPI) is a global renewable energy producer and developer, specializing in Solar Projects and Battery Storage Production. In January 2014, our subsidiary, Upower Honduras, signed a much-publicized 20-year Power ...

Honduras has launched a consultation on regulatory changes to its electricity network to help better integrate energy storage, which it said is key to maintaining the stability, efficiency and ...

ENERGY-HUB is a modern, independent platform for sharing information and developing the energy sector, merging academic, scientific, technologic and private sector. Last week (7 November) saw bids opened for a 75MW/300MWh BESS tender launched by the government of Honduras, in Central America.

Flexible power generation technology answers Honduras island's energy demands. Storage technology optimises engine plant performance and facilitates renewables integration. A major sustainable energy transition is happening in the Caribbean. Heavy fuel-based economies and vulnerability to extreme weather see the region pushing for greater ...

Energy Situation. The total primary energy offer in Honduras is around 4.62 Mtoe or 53,730.6 GWh. The main source of primary energy is petroleum (53%) followed by combustible renewable and waste (44%), and coal (3%). The residential ...
