What is a warranty for battery energy storage systems?

Warranties for Battery Energy Storage Systems (BESS) provide mechanisms for buyers and investors to mitigate the technical and operational risks of battery projects, by transferring the risk of defects or performance issues to the manufacturer or the battery vendor.

How does EnergySage score a battery warranty?

To help simplify the process for you, EnergySage has developed a scoring system that focuses on essential factors like product and power warranty terms, labor, shipping, and inverter coverage, and how easy it is to transfer ownership. Let's dive into some of the most popular battery brands on EnergySage and see which offers the best warranties.

Why do you need warranty insurance for your energy storage system?

Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more.

Does a full charge in Year 8 mean a longer warranty?

A full charge in year eight won't return the same output as a full charge in year one. As with any battery-powered electronic device, cycling your battery will diminish its output as the years go on. A greater cycle allowance doesn't necessarily mean a longer warranty term.

How does a battery warranty work?

Battery companies with outstanding warranties may cover these costs entirely or up to a certain amount of time or a certain travel distance (i.e., three hours of driving). Some manufacturers will pay for these costs by providing the company that performs the repair a rebate or check rather than reimbursing you directly.

How long do energy storage systems last?
