

How to check the solar product certification list

How do I know if my solar panels are MCS certified?

Check for Certification Markings: MCS-certified products, like solar panels, will typically bear a unique MCS certification mark or label. While it's a quick method for verification, consumers should be aware that some counterfeit products might imitate these markings. Therefore, always cross-check using other methods to ensure authenticity.

What is a VDE certified solar system?

VDE, EN, IEC and UL standards VDE tests and certifies balcony solar systems with immediate effect. The test specification was developed according to the current legal requirements and applicable regulations and standards. VDE's Quality Tested certification for photovoltaic modules go beyond the standard.

Does the MCS certificate only apply to solar panels?

While the focus of our article was on solar panels, the MCS covers various renewable energy products, including wind turbines, biomass boilers, and more. How often does an installer need to renew their MCS certification?

How do I become a Solar keymark certification body?

To become a Solar Keymark Certification Bodies, please contact Keymark management organisation. Please click here to view the matrix showing the relevant test labs for each certification body. 1. Testing laboratories: CENER (ES), Fraunhofer ISE (DE). 2.

How do I know if a product is MCS certified?

The MCS Website and Database: The most straightforward and reliable method is to use the official MCS website. It boasts a comprehensive, searchable database where consumers can input the name or details of an installer or product to verify their certification status.

How does a solar panel verification app work?

verification databases of serial numbers from approved solar photovoltaic (PV) modules provided by manufacturers. The apps let installers scan serial numbers and request verification against the database. If verified, installers can receive confirmation within seconds. The apps also send consumers a confirmation of their verified panels.

How to check if a solar panel is BIS certified? In order to check if a solar panel is BIS certified, you can find the BIS logo along with the tests done and a registration number on the solar panel cover and also on the sticker on the backside ...
