

How to use lithium battery high power saw blade

How do you put a battery into a saw?

Position the workpiece so that the saw blade is free to rotate beneath it. Check to ensure that the on/off switch on the product is in the "off" position. Position the forward section of the saw's base plate on the workpiece but do not bring the blade into contact with the workpiece. Fit the battery into the product.

How do you use a saw blade?

Hold the tool firmly. The tool is provided with both a front grip and rear handle. Use both to best grasp the tool. If both hands are holding saw, they cannot be cut by the blade. Set the base on the workpiece to be cut without the blade making any contact. Then turn the tool on and wait until the blade attains full speed.

How do you put a battery in a cutting machine?

Fit the battery into the product. Press and hold down the switch-on interlock and switch the product on by pressing the on/off button. Guide the product along the cutting line on the workpiece at a suitable speed. Pull the battery out of the product to the rear.

What should I do if my saw blade is binding?

When blade is binding, or when interrupting a cut for any reason, release the trigger and hold the saw motionless in the material until the blade comes to a complete stop. Never attempt to remove the saw from the work or pull the saw backward while the blade is in motion or kickback may occur.

How do you protect a saw blade?

DANGER: Keep hands away from cutting area and the blade. Keep your second hand on auxiliary handle or motor housing. If both hands are holding the saw, they cannot be cut by the blade. Do not reach underneath the workpiece. The guard cannot protect you from the blade below the workpiece.

How do you use a blade guard on a saw?

Keep hands away from cutting area and the blade. Keep your second hand on auxiliary handle, or motor housing. If both hands are holding the saw, they cannot be cut by the blade. Do not reach underneath the workpiece. The guard cannot protect you from the blade below the workpiece. Adjust the cutting depth to the thickness of the workpiece.

Before replacing the blade of a lithium cordless circular saw, be sure to turn off the power of the lithium cordless circular saw and unplug the battery to ensure safety. Check ...
