

# Is New Energy Battery a state-owned enterprise

What is a new energy enterprise (nee)?

Enterprises are important micro subjects of national economies and are the carriers of technological innovation. New energy enterprises (NEEs) are the primary body of the NEI and are an important source of new energy technology innovation power.

Should non-state-owned enterprises be regarded as drivers of green energy development?

Therefore, non-state-owned enterprises, especially private enterprises, should be regarded as the primary drivers of green energy development, with increased resource allocation toward them. Simultaneously, the internal governance of state-owned enterprises must be improved to align with the NEDCP and improve the level of GTI.

What is a non-state-owned enterprise (nee)?

Non-state-owned enterprises, represented by the private economy, compete in a fiercer market and thus show higher flexibility and innovation enthusiasm. As a new market-oriented industry, NEEs prioritize technology as a core competitive advantage in their development process, and are technology- and capital-intensive.

Why are state-owned companies better than non-state-owned enterprises?

Thus, state-owned companies are more stable in R&D investment and continuity, which guarantees creative activities. Non-state-owned enterprises, represented by the private economy, compete in a fiercer market and thus show higher flexibility and innovation enthusiasm.

Do pilot cities increase the use of new energy vehicles?

Since 2013, 88 cities have been identified as pilot cities to increase the use of new energy vehicles in two nationwide batches. The implementation of these two pilot policy types coincided with the implementation of the new energy demonstration city policy, and these two pilot policies had a significant positive impact on the GTI of enterprises.

How does the nedcp promote the GTI of non-state-owned companies?

The NEDCP mainly induces the GTI of non-state-owned companies and companies in regions focusing on the development of photovoltaic and biomass energy industries. The NEDCP promotes the GTI of NEEs, mainly by alleviating external financing constraints, strengthening internal incentives, and creating a favorable market environment.
