

Is it a scam to replace new batteries with new ones

Is battery reconditioning a scam?

Battery reconditioning scams were popular a few years ago, and it looks like there's still life left in the old trick. The interesting thing is if you do some research, you'll find information about battery reconditioning on the web. Some people say it's real, others say it's a scam.

Should I buy a replacement battery?

Sadly if you want a good battery, the best bet is to buy the expensive replacement directly from the manufacturer, because they will probably send you an actual working battery, and if they don't, they will honor the battery's warranty and replace it. This also holds true to mobile batteries for older devices that show health percentages.

Can I replace my iPhone battery with a non-original battery?

Replacing your iPhone's battery with a non-original one can be safe if you go to a reputable third-party repair shop. Many people have done it and had positive experiences, but the thing is, non-original batteries might not perform as well or last as long as genuine Apple batteries. To help your new battery last longer, consider using a Chargie.

Should I buy a 'fake' battery?

If you can afford the original, get one. However, I replaced mine with a 'fake' battery and it's working fine. The only thing is you can't check battery health like you can with an Apple battery. The warning goes away after a few charges/days, I forget now. My battery, with 7hrs of screen time, will last all day on my days off.

Are counterfeit batteries a scam?

The FBI has issued a public service announcement (PSA) warning consumers of the risks of buying counterfeit batteries for their devices. The bureau warns that scammers are using "vulnerabilities in the global supply chain" and constant consumer demand for new batteries to sell a variety of counterfeits and unauthorized replicas online.

Can I use old battery with new battery?

If you use old battery with new battery then it's harmful for new batteries. Battery power is not constant and reduce the new battery power too. This doesn't really answer the question.

The bureau warns that scammers are using "vulnerabilities in the global supply chain" and constant consumer demand for new batteries to sell a variety of counterfeits and ...

Today I received a new HR54-500 receiver (identical to the one I already have) delivered by Fedex. Looking at my account, I see that equipment order, with a second receiver listed as "not active swap" with a matching serial number to the one I received. "Justin" said to call him when I received the receiver and he would set it up. Is this ...

When buying a new battery, purchase one from a high-volume seller with fresh stock to ensure it hasn't lost its service life sitting on the shelf. Look for batteries with an extended full-replacement warranty, usually three or more years, for free replacement if needed. Avoid warranties that quickly switch to pro-rated coverage, requiring partial payment for a replacement after the ...

I'm unhappy with this situation for two reasons: AAA promised to replace my battery with a new one, not a used one. Maybe \$220 isn't a big deal for some, but three years ago I bought a new ...

However, batteries sold at deep discounts or at significantly lower-than-average prices are likely counterfeit," the FBI warned. "Consumers can familiarize themselves with legitimate manufacturers' designs and look for any significant variations when purchasing new or replacement batteries to avoid purchasing counterfeits."
