

Why do you need a battery and energy system training program?

With the world transitioning to a more sustainable future, our program provides critical knowledge and skills to stay ahead of the curve and seize emerging opportunities. Unlike other training programs, we offer a unique, cross-sector structure that covers all aspects of advanced battery and energy system technologies.

What is battery energy storage training?

This training program delivers a thorough and business-focused analysis of these opportunities, empowering participants to analyze and comprehend the complexities of this dynamic field. While the primary focus is on Battery Energy Storage, our course also delves into various competing storage technologies.

What is a battery storage course?

This course focuses on the most exciting battery storage technologies, exploring how they work, their strengths and weaknesses, and their application across a breadth of sectors. This course covers how energy vectors - fuels, electricity, and heating - interact and how to find added value at the interfaces between them.

What is the battery storage Expert program?

The Battery Storage Expert Program covers the entire battery value chain, battery system management, energy storage systems, regulations and business models. Interested? Contact us!

What is Neny's battery Academy?

NENY's Battery Academy includes an online learning platform administered by Binghamton University and supported by InnoEnergy Skills Institute. In addition to online workforce training, we offer in-person labs and virtual reality learning to prioritize safety and hands-on skill development.

Who is new energy training?

Contact us today for all your New Energy Training questions. New Energy Training Pty Ltd is a Registered Training Organisation (RTO 45919). RTOs are providers and assessors of nationally recognised training that have been registered by the Australian Skills Quality Authority (ASQA). Only RTOs can issue nationally recognised qualifications.
