

What are Arimon battery cabinets?

Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access batteries or top terminal (monobloc) batteries. All battery cabinets are constructed from heavy gauge steel with a durable welded frame and acid resistant powder coated finish available in a wide range of colors.

Does Hiltons have a battery backup?

That's why Hiltons take battery backup seriously. We offer a comprehensive range of emergency lighting system options including uninterrupted power supply, maintained and unmaintained battery cabinets and isolated power supply units. Emergency lighting functions through a battery backup unit.

What is a dual door backup cabinet?

The backup units detect power failure and automatically switch the emergency supply. It means that you can continue to deliver care in the event of a power cut. Dual Door Backup Cabinet

What are the advantages of a modular hot-swap battery cabinet?

Modular hot-swap battery cabinets with string protection and individual string disconnection. - Frontal switch/breaker protection. - Frontal input output connections. - Easy battery replacement. - Suitable for rigid cables and cable-glands. - Suitable for tripping coil contact (on request).

Why is a sealed battery a good choice?

Sealed batteries do not allow for water to be added to the electrolyte, therefore the evaporation of the water contained in the electrolyte, due for example to high room temperatures or internal heating as a result of charging/discharging cycles, decreases their lifetime. - Designed to satisfy and respect safety protection standards.

Can a monobloc or top terminal battery cabinet accommodate multiple string configurations?

All monobloc or top terminal battery cabinets accommodate single or multiple string configurations. Arimon offers full battery monitoring solutions, including all necessary hardware and cabling, to fit your specific application.

Installing battery backup units in your building when your main power supply is cut off and normal lighting fails is critical in an emergency. With a system that has a battery backup, the lighting will immediately switch to emergency operation when power is lost. Typically, these lights come with at least a 90-minute lighting ...

o CSA Certified Backup time: 30 minutes at 36W (4W from attached heads + up to additional 32W) o Test switch and charge indicator light o Overcharge & Over-discharge protection

Arimon uninterruptible power supply (UPS) backup battery cabinets are available for either front access

batteries or top terminal (monobloc) batteries. All battery cabinets are constructed from ...

Battery back-up systems are available in two styles: Unmaintained: Unmaintained battery cabinets are normally placed in a plant room or "dirty corridor" which provides easy access.
