

LICAP Technologies is known as a world-class manufacturer of supercapacitor and lithium-ion capacitor products. They are committed to developing and producing energy storage solutions with market leading performance.

The lithium-ion capacitor combines a negative electrode from the battery, composed of graphite pre-doped with lithium-ions Li^+ , and a positive electrode from the supercapacitor, composed of activated carbon. This allows the LIC to acquire a higher energy density than the SC, while conserving a high power density and a long lifetime. The LIC has ...

A lithium-ion capacitor is a hybrid electrochemical energy storage device which combines the intercalation mechanism of a lithium-ion battery anode with the double-layer mechanism of the cathode of an electric double-layer capacitor . The combination of a negative battery-type LTO electrode and a positive capacitor type activated carbon (AC) resulted in an energy density of ...
