

What is a lead acid battery (LME)?

It provides a platform for trading and price discovery of a wide range of metals, including copper, aluminium, and lead. The LME sets the benchmark prices for these metals, which are used as references for contracts and transactions all over the world. Lead acid batteries are among the most frequently recycled consumer products on the planet.

How has the price of scrap lead batteries changed?

Observing the changes in lead prices on the stock exchange, it can be said that the price of scrap lead batteries has not changed significantly recently. According to the website scrapprice.com, it can be seen that the highest price for scrap batteries is in Belarus, but this may not be entirely true.

What are the different types of lead acid batteries?

Lead acid batteries can be split into 3 main categories. These are flooded, gelled, and Advanced AGM (Absorbed Glass Mat) with the most common types of battery falling under flooded (such as automotive). The price of lead per kg can change daily and is impacted by a number of economic and environmental factors.

What happened to the lead price in 2024?

At the start of 2024, in the first month of January of this year, the price of lead increased to 4%. However, at the beginning of February, there was a significant decrease again. Everything is very clear in the lead price graph below. Looking at last year's lead price, one could conclude that the value of lead remained the same.

Can lead acid batteries be recycled?

It is for this reason that lead acid batteries must be recycled at a professional recycling centre to avoid any hazardous waste seeping into the environment causing health issues. Before recycling, lead batteries must be pulverised at a hammer mill to remove toxic chemicals from them, such as lead paste, before they can be reused in other products.

How is the market price for lead influenced by the recycling industry?

The market price for lead is heavily influenced by the recycling industry as the shift towards using recycled materials instead of virgin lead. To provide live pricing, we use the app "Gold Kitco". Gold Kitco is a renowned precious metals market data and analysis provider.

According to Battery Recyclers of America, a truck or car's lead-acid battery scrap price is an average of \$0.24 per pound (Dated May 22 Monday 2023).

Lead-Acid Battery Recycling Process. Lead-acid batteries are the main source of lead scrap for recycling, accounting for nearly 90% of the total lead scrap available for recycling. There are two types of lead-acid batteries: starting batteries and deep-cycle batteries. A starting battery quickly delivers a large burst of power

to help an engine ...

If you are looking to sell your scrap lead acid batteries, Clarity can offer competitive market rates with prompt, reliable collections nationwide. We purchase wasted lead acid batteries from ...

Inexpensive, reliable, high-powered and easy to recycle and replace, lead-acid batteries are still used in EVs to power various systems such as lights and windows. Lead is expected play a ...

Non-ferrous prices discovered on our platforms are used as the global reference price.

Updates May 7th, 2024: Added details on INMETRO certification for new batteries and tax elimination on scrap ULABs. August 10th, 2024: Added link to 2023 IBER report. Informal used lead-acid battery (ULAB) recycling is often seen as a basically unsolved and insoluble problem -- despite being a major cause of global lead poisoning.. But analysts do ...
