

# New Energy lights up yellow battery fault light

What does a faulty battery light mean?

Here are some common fault indicators you may encounter: **Flashing Red or Amber Light:** This light often indicates a problem with the battery, such as a faulty connection, a short circuit, or an incompatible battery. In such cases, you should double-check the battery and charger compatibility and ensure proper connections.

Why is my solar charge controller light blinking green?

**Image 1: Solar Charger Controller LED Light Blinking Green.** Furthermore, the LED light on the solar charge controller will change color based on the battery's voltage levels. When the voltage decreases to the under-voltage level, the LED light turns orange or yellow, indicating a low battery condition.

Why is the battery icon flashing?

On the other hand, if the battery icon is slowly flashing, it signals that the battery is losing power and needs to be charged promptly. This could be due to the depletion of stored energy in the battery, and timely charging is essential to ensure continuous and reliable power supply.

What does a flashing green light mean on a battery charger?

On the other hand, a flashing green light may indicate a maintenance or trickle charging mode, where the charger keeps the battery at an optimal level. **Amber or Orange Light:** Some battery chargers use an amber or orange light to indicate that the battery is nearing a full charge.

What does a flashing red light on a battery charger mean?

A flashing red light on a battery charger usually signifies that there is an issue with the charging process. It could indicate a problem with the battery, such as low voltage or a faulty connection. It is advisable to refer to the charger's manual to identify the specific issue associated with the flashing red light.

Why is my solar charger light blinking orange?

When the voltage decreases to the under-voltage level, the LED light turns orange or yellow, indicating a low battery condition. At this point, it is crucial to take prompt action to recharge the battery to prevent over-discharging and potential damage to the battery. **Image 2: Solar Charger Controller LED Light Blinking Orange.**

I had a couple of failed firmware updates which probably didn't help and ended up with a red status light on the battery. GivEnergy did a reasonable job of fiddling with it ...

**Solid Yellow:** Solar matching mode. The unit is using micro-generated, on-site electricity to charge your EV. **Solid or flashing Red:** Fault. The unit has encountered an error. Perform a hard restart on the unit by turning the rotary isolator switch on and off or by flipping the RCD inside the house consumer unit. If the steady red
