

How do I install a new battery?

**Clean Battery Tray:** Before installing, clean any corrosion from the tray using baking soda mixed with water.

**Position New Battery:** Place your new battery into the tray, ensuring it is oriented correctly (positive terminal on positive side).

**Secure Battery:** Reinstall any hold-down brackets to secure the new battery in place.

What should I do if I have a new battery?

If you have a receipt for your existing battery, it's a good idea to bring it with you when you purchase a new battery because it may contain warranty information that'll be helpful. If possible, once you remove the existing battery, it's a good idea to take it to an auto parts retailer. Many retailers offer battery disposal or recycling services.

How do you change a car battery?

This article has been viewed 2,158,304 times. To change a car battery, pop the hood of your car and locate the battery, which will be kept on either side of the car's frame. Disconnect the negative terminal, which is labeled with a minus sign, before disconnecting the positive terminal to keep it from short-circuiting.

How do you replace a battery?

Secure the new battery to the bracket and grease the terminals. Place the new battery in the battery tray and secure it to the bracket. Simply reverse the process you used to remove the battery from the bracket. Then, coat each of the terminals in a thin layer of lithium grease to prevent corrosion.

How long does it take to replace a car battery?

Replacing a battery in a car may seem intimidating, but if done correctly with the right tools, it can be a simple part of car repair and maintenance. Replacing a battery can usually be completed in as little as one hour. We'll show you how to change a car battery on your own. [When Do You Need to Replace a Car Battery?](#)

How do you clean a new battery?

**Clean the terminals** - Use a wire brush to remove corrosion or dirt from the battery cable ends and terminals. A clean connection helps the new battery function properly. **Apply terminal grease** - Apply a small amount of terminal grease to the terminals to prevent future corrosion.

Automotive batteries don't last forever, even if they're taken care of properly. If you notice your headlights dimming, if your car needs a jump-start due to a dead battery, or if your battery is more than 3 years old, it's time to replace it. Fortunately, this is a quick and easy project you can tackle at home with only a few basic tools.
