

New energy battery insurance refused to pay

More energy deals with NO standing charges finally on the cards following Martin Lewis' calls for action - here's what's happening. Energy suppliers will need to offer tariffs with low or no standing charges under new plans to tackle the issue of high standing charges, which make up over £330 of most people's annual bills.

Yeah my AC+ expires today too, with 85% capacity left. Since January, that number just kind of stayed there, didn't drain at all. Was hoping to get my battery replaced before today, but it is what it is I suppose. I won't be renewing with monthly payments. I'll just pay the \$70 or whatever it is for a new battery when the time comes.

Recently, some owners of new energy vehicles have had unexpected problems when renewing their clear insurance premiums. Some insurance companies require car owners to add expensive additional insurance,...

Compared with traditional fuel vehicles, new energy vehicles are ?... in environmental protection. With the continuous development of science and technology, new energy vehicles are gradually entering the public's field of vision and becoming one of the important choices for people's daily travel.

Don't Pay UK points out that 17 million people refused to pay the tax. It was abolished in March 1991 and replaced by the council tax in 1993. However, whether this sets a precedent for protests over high bills for gas and electricity is debatable given that energy customers have agreed to pay their supplier for the service. In other words ...
