

Is the Nordic battery value chain a good investment?

In 2021 the Swedish Energy Agency and Business Sweden published two reports* concluding the complementary strengths within the Nordic battery value chain, a strong momentum for industry potential, a shared interest in joint trade and investment promotion as well as a need for coordinated actions.

Why is the Nordic battery ecosystem important?

Actors within the Nordic battery ecosystem are active on global markets with strong ambitions and devotion to sustainability. The European context is decisive for business as Europe and the EU is the main region for Nordic trade and investments.

What is the Nordic battery collaboration?

The Nordic Battery Collaboration is a key initiative. The decision to carry out this report was taken by Business Sweden, Business Finland, Innovation Norway and the Swedish Energy Agency together. All parties are financing the report. The report is conducted by Business Sweden.

When did battery 2030+ hold its Nordic Regional Meeting?

Date of latest update: 28th June 2023 BATTERY 2030+ held its Nordic regional meeting in conjunction with the fifth NordBatt, a conference gathering the Nordic-Baltic battery R&D&I community; academics, industrials and other stakeholder to a round table discussion with speakers from almost all countries in the Nordic and Baltic region.

How long will the Nordic battery collaboration last?

In August 2022, the CEOs of the three organisations approved an additional three years of the Nordic Battery Collaboration and plan for a three-year roadmap for 2023-2025. How does the Nordic Battery Collaboration work?

Which countries have a strong position in the European battery market?

By combining complementary strengths, Norway, Sweden, and Finland have vast potential for developing a strong position in the growing European battery market. The battery industry is rapidly evolving across the region, utilising advantages including clean, affordable energy and a strong manufacturing industry.

Last week the latest report on the Nordic battery value chain was published. The report discusses the status of the Nordic battery value chain at the end of 2022, the drivers in the market, as well as what is needed to build the industry further.

This report maps out the Nordic battery value chain and highlights key necessities of the Nordic ecosystem on how to grasp the opportunity of sustainable batteries 4

Beyonders goal is a full-scale battery factory, preferably located in Rogaland with start of construction in 2023 Sustainable cells based on sawdust, with high power, fast charging and ...

Positioning the Nordic countries to benefit from sustainability requirements in the new EU Regulatory Framework for Batteries proposed by the Commission and expected to be adopted during 2022. The Nordic countries should position themselves to support and subsequently benefit from the expected (i) rules on recycled content; (ii) measures to improve the collection and ...

By combining complementary strengths, Norway, Sweden, and Finland have vast potential for developing a strong position in the growing European battery market. The battery industry is rapidly evolving across the region, utilising advantages including clean, affordable energy and a strong manufacturing industry.

NORDIC BATTERY THURSDAYS WELCOME TO THE HOME OF NORDIC BATTERY THURSDAYS COMMUNITY. In a joint effort, Innovation Norway, Business Finland, and Business Sweden - in collaboration with the EBA250 initiative of the European Battery Alliance driven by EIT InnoEnergy - welcome Nordic, European and global players to engage ...

They show that the Nordic Battery Belt (NBB) is an emerging cross-border regional network established to proactively identify the prevailing and the envisaged connectivity challenges within the ...

This Research Debate is based on the research article in Fennia: Okonkwo, E. 2022: An overview of the Nordic Battery Belt: an emerging network for cooperation within the Nordic battery cluster. Fennia - ...

Beyonders goal is a full-scale battery factory, preferably located in Rogaland with start of construction in 2023 Sustainable cells based on sawdust, with high power, fast charging and long lifetime Panasonic, Equinor and Hydro signed a Memorandum of Understanding (MoU) in 2020 The companies invited municipalities in Norway in December 2020 to notify interest in hosting ...

By combining complementary strengths, Norway, Sweden, and Finland have vast potential for developing a strong position in the growing European battery market. The battery industry is rapidly evolving across the region, utilising advantages ...

Statistics for the 2023 & 2024 North Europe Battery market share, created by Mordor Intelligence(TM) Industry Reports. North Europe Battery share report includes a market forecast ...

"Excited to join the board of Nordic Batteries and combining this with the Strategic Advisor role. The company has positioned itself in what I see as the sweet spot between the cell manufacturing and the applications addressing the need for smart and well-designed modules and systems for various applications in the battery market. The company ...

Explore our on-demand interviews and discussions, insights and reports from the three member organisations

and experts in the different fields from the battery value chain. These insights ...

Nordic Battery Belt - Feasibility study 2.1 Human capital management One of the major challenges for the Nordic Battery Belt is to find enough skilled labour for the job openings in the battery industry and society in general. Northvolt in Skellefteå; says it will hire up to 4 000 employees by 2025. Freyr in Mo i Rana is looking

Statistics for the 2023 & 2024 North Europe Battery market share, created by Mordor Intelligence(TM) Industry Reports. North Europe Battery share report includes a market forecast to 2029 and historical overview. Get a sample of this industry share analysis as a ...

The Report Covers North Europe Portable Battery Market Growth & Trends and it is segmented by Type (Li-Ion Battery, Lead Acid Battery, Flow Battery, and Others), Application (Automotive (HEV, PHEV, EV), Industrial (Motive, Stationary (Telecom, UPS, Energy Storage Systems (ESS), etc.), SLI Batteries, Portable (Consumer Electronics, etc.), and ...
