SOLAR PRO. Original battery for battery swap cabinet

Why should you choose tycorun battery swap cabinets?

Empower your electric motorcycle with TYCORUN's advanced battery swap cabinets. Simplify operations, boost efficiency, and redefine the future of mobility. As the earliest expert to enter this industry, TYCORUN has developed a complete set of profitable battery swap system with years of technology precipitation and successful operating experience.

Why do you need an electric motorcycle battery swap cabinet?

The electric motorcycle battery swap cabinet has been the perfect fit. Its modular design allows us to add more cabinets as our fleet expands, without requiring any major infrastructure changes. This scalability feature has saved us significant costs and allowed us to easily accommodate our growing number of electric motorcycles.

How tycorun battery swap system works?

As the earliest expert to enter this industry, TYCORUN has developed a complete set of profitable battery swap system with years of technology precipitation and successful operating experience. Born in a Battery Factory, TYCORUN batteries employ Grade A cells and Tesla aluminum wire welding technology, undoubtedly surpassing the quality of peers.

Chassis swapping refers to the method of removing the original battery pack from the bottom of the chassis and replacing it with a new battery pack. The battery pack is typically installed on the vehicle chassis, offering good concealment and high safety. This solution is mainly applied in sedans, SUVs, MPVs, and light logistics vehicles, currently adopted by companies like BAIC, ...

HEXUP specializes in providing battery swap stations/cabinets and swapper solutions for electric scooters, ensuring safe charging and convenient lithium battery exchanges. Discover our innovative products for efficient and reliable battery swapping.

It has formed five battery series including UPS battery, energy storage battery, communication battery, electric vehicle battery and motorcycle battery of more than 300 specifications and models, with product coverage: ...

Reducing the number of parallel connections of each series in the original battery pack by one, and replacing the cells of battery failure with the reduced normal cells is the method of subtraction and combination. For example, 10S5P ...
