The City of Ottawa is partnering with SAP Ariba to electronically exchange purchase order and invoices with our suppliers - improving invoice processing timelines and the supplier experience

Are battery cells uL 9540a certified?

Battery cells,modules,and units (racks) are tested to UL 9540AStandard for Test Method for Evaluating Thermal Runaway Fire Propagation in Battery Energy Storage Systems. UL9540 Energy Storage Systems and Equipment is a system level certification for the batteries and the inverters.

Bidding opportunities (2021) o At the City of Ottawa over 500 bid solicitations issued annually on average - This includes Requests for Tenders, Proposals, Standing Offers, Quotes etc.

The lead acid battery uses the constant current constant voltage (CCCV) charge method. A regulated current raises the terminal voltage until the upper charge voltage limit is reached, at which point the current drops due to saturation. The charge time is 12-16 hours and up to 36-48 hours for large stationary batteries. With higher charge currents and multi-stage ...
