

What are solar powered pillar lights?

Solar-powered pillar lights generally come with a ground spike, hence they are flexible. They can be easily moved to a different location. They are perfect for design fans. Tip: solar-powered pillar lights are best positioned where they can soak up a lot of sunshine during the day. Otherwise the battery won't charge fully.

Are solar pillar lights worth it?

There are no electricity costs and a tangle of cables is a thing of the past. Solar-powered pillar lights generally come with a ground spike, hence they are flexible. They can be easily moved to a different location. They are perfect for design fans.

Can you use pillar lights outside?

You can also get pillar lights made of aluminium and other metals, which are suitable for use outside. In order to ensure that the bulb is well-protected but can still shine brightly, glass or plastic lampshades are a good option. All you need to do now is make your choice and get started with outdoor lighting.

How to protect solar products?

To protect solar products well, the solar panels will be packed in pallets with Sunway logo or your logo or no logo. Solar inverter, battery, bracket, and PV combiner box will be packed in pallets as above.

What Pillar lights should I buy?

Durability is desirable. Robust stainless steel ticks the box here. You can also get pillar lights made of aluminium and other metals, which are suitable for use outside. In order to ensure that the bulb is well-protected but can still shine brightly, glass or plastic lampshades are a good option.

Can pillar lights be installed on the ground?

When installing them on the ground, we recommend installing them on a frost-proof stand or on a similarly solid material. This will give your pillar light a secure footing. If you don't want it fixed in place, you would be well-advised to opt for a pillar light with a ground spike.
