Batteries are essential to renewable energy sources like solar and wind. As the intermittent nature of renewables poses a challenge to grid stability, BESS can act as giant "power banks" for building operators and industrial sites, ...

Harnessing abundant solar resources, an eco-resort located off the coast of Panama has chosen advanced lead batteries, paired with a battery management system (BMS), to power their island microgrid. This unique project has installed new lead batteries to the existing battery energy storage system.

High Efficiency: Advanced Lithium-Ion and other battery technologies with optimized energy density. Long Lifecycle: Durable and reliable systems designed for extended performance. Smart Management: Integrated software for monitoring and managing energy usage in real time. Safety Assurance: Built with robust safety features to ensure reliable operation under all conditions.
