

What is a customized battery?

A customized battery refers to batteries designed to meet the specific requirements of portable electronic devices and wearable devices. These batteries have unique shape, size, durability, and discharge rate demands. As consumers, we desire light and durable electronic equipment.

Can a printed battery be customized?

The printed battery as a product is fully customisable. Printing technology in principle offers great product design freedom. Hence, there are no limits in sizing the battery to your needs. However, the size of the battery has an impact on the energy and power density.

What is a fine custom battery solution?

Fine Custom Battery Solutions for a Variety of Industries and Applications, such as 18650 battery, battery packs, polymer lithium battery, lithium iron, phosphate battery and special battery (ultra thin, special-shaped). All lithium batteries have been certified, including KC, ROHS, CE, UL1642, UN38.3, BSMI, etc.

Are all lithium batteries certified?

All lithium batteries have been certified, including KC, ROHS, CE, UL1642, UN38.3, BSMI, etc. Dimensions are required to assist with your request. Please ensure they are accurate above. All our lithium batteries can be customized with battery packs. Contact us with requirements. The technical team creates tailored designs.
