

What is the warranty period of isitepower-m?

The actual warranty period and lifecycle electricity are subject to the contract. The warranty restrictions of the iSitePower-M are the same as those of the LUNA2000. The warranty period starts from the 90th day after Huawei products are shipped, or from the day when Huawei receives the request for product service (whichever is earlier).

How long is the warranty on the power supplies?

These products come with a 10 Year Product Warranty and a 25 Year Linear Power Warranty. TSM-PE15H 340-355W products have a silver frame and are EU-28 WEEE compliant. The recyclable packaging is also a part of this offer.

What is the warranty period of a Huawei Device?

The actual warranty period is subject to the contract. The customer purchases the extended warranty service with the product, or the warranty of the device purchased by the customer is about to expire or has expired (the device has passed the health check) and the customer still wants to enjoy Huawei's maintenance assurance service.

Which products are covered by a warranty?

A warranty is provided with the products by default and not sold independently. Cables, accessories, and antennas are excluded from the warranty by default. For warranty strategy details, please refer to the table below. The following table provides the basic warranty periods for each product. The actual warranty period is subject to the contract.

Does the warranty cover battery damage if ESS products are not connected?

For ESS products that are not connected, the warranty does not cover the battery cell damage caused by failure to upgrade the products in time. To remotely upgrade the firmware to ensure the service life of battery cells, the LUNA2000-(7/14)-S1 must be connected to the Huawei FusionSolar SmartPVMS.

When does a DCDC power module warranty expire?

The warranty of a DCDC power module or energy storage control unit expires when the specified warranty period ends, irrespective of the battery performance. An independent warranty is provided for battery packs and power modules or energy storage control units.
