HydroXcel was founded in end 2017, the company has a highly educated international R& D team, and is a technology-based enterprise specializing in the R& D, promotion and application of hydrogen fuel cell technology. The company's main products cover ...

Now the Austrian team is developing an alternative. The new battery type is oxygen-ion. Like all batteries, the oxygen-ion batteries are made up of plates--although these plates are constructed from a ceramic material. The use of non-combustible, ceramic materials means that the fire danger is greatly reduced.

Hengelo, The Netherlands, 26 January 2021 - Delft University of Technology (TU Delft) spin-off Battolyser is preparing to install a large-scale battery-based energy storage system that will also produce hydrogen. The patented technology will challenge the dominance of conventional alkaline electrolyzers in hydrogen and ammonia production and help make the ...
