

Which solar panel should I buy?

The BigBlue SolarPowa 100 is an affordable and efficient solar panel. The Dokio 110W 18V Portable Kit is one of the least expensive panels we tested and by far the most affordable panel that still works well as a solar panel. We didn't have high hopes for this model because it was so inexpensive.

What are the best portable solar panels?

The Anker Solix 100W Foldable is another one of the most portable solar panels we tested. This panel folds up into a small size, is lightweight, and has an integrated handle. It's not the absolute smallest and not quite the lightest, but it's light and small enough.

How to choose a portable solar panel?

There are two things you need to check: load compatibility and port compatibility. For load compatibility, check that both the volts and the wattage supplied by the portable solar panel won't overload your power station.

Which solar panel is best for camping?

The Jackery SolarSaga 100 continues to be our favorite solar panel for camping. Our testers found this 100-watt panel is easy to use, lightweight, and effective in full and partial sun. It's more affordable than many competing models, but it works better than those models.

Which solar panels are best for direct sunlight?

The Greccell 100W Portable (60.3 Wh), Allpowers SPo12 100W Panel (59.2 Wh), Dokio 110W 18V Portable Kit (57.6 Wh), and BioLite Solar Panel 100 (53.6 Wh) also performed well in our direct sunlight solar generation tests. While these panels didn't perform quite as well as the top performers, they still generated a high amount of charge over one hour.

Which Jackery solar panel is best for camping & off-grid living?

The Jackery SolarSaga 100 offers the best overall value for a large solar panel for camping and off-grid living. This panel isn't the least expensive model we tested, nor is it the most expensive, but its performance and efficiency are some of the best we've seen. The Jackery SolarSaga 100 offers excellent value for your solar camping setup.

Our elite testing team analyzed each panel's charging abilities, determining that not all 100-watt solar panels are equal. We took these panels out on cheerful, sunny days and dim, overcast conditions, testing them side-by-side to see how they stack up. The best solar panel for camping in our testing was the Jackery SolarSaga 100.
